## Calculation Policy: 2020

### Mission Statement

*To encourage high levels of achievement through the enthusiasm and joy of learning, coupled with a creative curriculum and a holistic approach to education that reflects Christian values and supports our community.  
We guarantee accessibility and availability to all.'*

*Developing potential*

## Mental and Written Calculations

This policy outlines our approach to both the **mental** and **written** methods that should be taught from Year 1 to Year 6.

The policy has been written according to the National Curriculum, and the written calculations for all four operations are outlined in the appendices of the prescribed Programme of Study.

This document builds on the interconnectedness of mathematics and outlines the progression for addition, subtraction, multiplication and division. We ensure that addition and subtraction are taught at the same time to ensure children so that they can see the clear links between the operations and the inverse nature of them when applied to multiplication and division.

Children should **secure mental strategies**. They are taught the strategy of counting forwards and backwards in ones and tens first and then 'Special Strategies' are introduced. Children are taught to look carefully at the calculation and decide, which strategy they should use. Children should explain and reason as to why they have chosen a strategy and whether it is the most efficient.

The formal written methods should be introduced with caution. Calculations that require a written method should be presented to the children and models and images, such as, place value counters, etc. should be used to ensure children have a conceptual understanding of the written method and that it is not a process that the children use for every type of calculation regardless of whether it can be completed mentally or mentally with jotting, i.e. the number line.

The policy outlines the **mental strategies** that children should be encouraged to use:

- A mental strategy that they can always rely on, E.g. counting in tens and ones, forwards and backwards, E.g.  $56 - 25$  (countback in 10s 56, 46, 36 and back in ones 36, 35, 34, 33, 32, 31)
- A special strategy they can select from a small range of strategies if they can see something special about the numbers they are being asked to calculate with, E.g.  $46 - 24$  (I can use near doubles to support my calculation, E.g.  $46 - 23 - 1$ )

The policy outlines the **written methods**, as suggested in the appendices of this policy and suggests that children:

Look at a calculation and decide whether it can be done mentally, mentally with a jotting or whether it needs a written method.

Should always be shown written methods with place value apparatus to ensure children are clear about the value of the numbers that they are calculating with and the numbers do not just become digits.

Estimate, calculate and check to ensure that the answer they generate has some meaning.

To develop understanding, there may be occasions when examples that can be completed mentally may be shown as a written method purely to develop an understanding of the method. This needs to be made very clear to children, and when they are practising the methods, appropriate calculations should be used.

There is also a section on calculating with fractions; the expectations from Y1—Y6 and examples with the models and images that should be used to ensure children develop a conceptual understanding when calculating with fractions.

## Key representations to support conceptual understanding of addition and subtraction.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

36...46,  
56, 66

76...86,  
56, 46

$6 + 10 = 16$       $96 - 10 = 86$   
 $16 + 10 = 26$       $86 - 10 = 76$   
 $26 + 10 = 36$       $76 - 10 = 66$   
 $36 + 10 = 46$      etc.  
 $36 + 20 = 56$       $76 - 30 = 46$

$10 = 7 + 3$

The difference between 11 and 14 is 3.  
 $14 - 11 = 3$   
 $11 + \square = 14$

$8 + ? = 10$

$15 + 5 = 20$

# DEVELOPING UNDERSTANDING OF ADDITION AND SUBTRACTION

Year 1	
Objectives	Recall of Facts
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs	= + If we know $4 + 5 = 9$ We also know: , $5 + 4 = 9$ $9 - 5 = 4$ $9 - 4 = 5$ $14 + 5 = 19$ $19 - 14 = 5$ , etc
<b>represent</b> and <b>use</b> number bonds and related subtraction facts within 20	
add and subtract one-digit and two-digit numbers to 20, including zero	Work with all numbers up to 20.

Children need to be secure with Using and Applying these skills in unfamiliar contexts before moving into the Year 2 objectives.

## Mental Jottings with representations

Immerse children in practical opportunities to develop understanding of addition and subtraction. Link practical representations on a number track on a beadstring to recording on a number line. By the end of Year 1 children should be able to recall and use facts within and to 20.

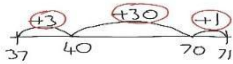

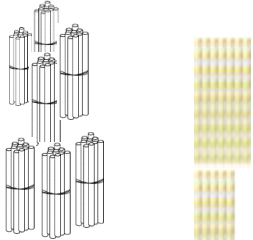

1. Combining two or more quantities

Tom has 5 bears. Mum has 3 bears. How many more does Tom have?

2 bears and 3 bears is 5 bears altogether  $2 + 3 = 5$

Year 2																							
Objectives:	Mental Recall/Jottings:	Written Methods with representations																					
<p>Show that the addition of two numbers can be done in any order and subtraction cannot.</p> <p>Recall and use addition and subtraction facts to 20 fluently and derive and use related facts up to 100.</p> <p>Add and subtract numbers using concrete objects, pictorial presentations and mentally including: 2 digit number and ones</p> <p>2 digit number and tens</p> <p>Two 2 digit numbers</p> <p>Add three 1 digit numbers</p> <p>Solve problems with addition and subtraction:</p> <ul style="list-style-type: none"> <li>using concrete objects and pictorial representations, including those involving numbers, quantities and measures</li> <li>applying their increasing knowledge of mental and written methods</li> </ul>	<p><b>Using known facts</b> If I know: <math>2+3 = 5</math> I also know: <math>3+2 = 5</math> <math>20 + 30 = 50</math> <math>30 + 20 = 50</math> <math>50 - 30 = 20</math> <math>50 - 20 = 30</math></p> <p><b>Bridge through 10</b> <math>26 + 7 = 26 + 4 + 3</math> <math>26 + 4 = 30</math> <math>30 + 3 = 33</math></p> <p><b>Counting on/back in 10s</b> <math>26 + 20 =</math> <math>67 - 20 =</math></p> <p><b>Partitioning</b> <math>23 + 34 =</math> <math>46 - 25 =</math></p> <p><b>Special Strategy</b> <b>Rounding and adjusting</b> <math>+9 - 9 + 11 - 11</math></p> <p><b>Bonds to 10</b> <math>2 + 7 + 8 = 8 + 2 + 7</math></p> <p><b>Finding the difference between two numbers. <math>71 - 37</math>:</b></p>  <p><b>Partitioning numbers in different ways in preparation for subtracting using decomposition:</b> <math>90 + 2</math> <math>80 + 12</math> (I have subtracted a ten and added it onto the ones) Continue to record mental jottings as outlined in Year 2 with increasingly larger numbers. Use suitable resources as required (See models and images page). Children that have not achieved the age-related expectations for Year 2 should not move onto formal written methods until they are secure with mental recall/jottings.</p>	<p>Recording addition and subtraction in columns helps to support place value and prepares for formal written methods.</p> <table border="1" data-bbox="1375 336 1590 651"> <thead> <tr> <th>Tens</th> <th>Ones</th> </tr> </thead> <tbody> <tr><td>10</td><td>1</td></tr> <tr><td>10</td><td>1</td></tr> <tr><td>10</td><td>1</td></tr> <tr><td>10</td><td>1</td></tr> <tr><td>10</td><td>1</td></tr> </tbody> </table>  <table border="1" data-bbox="1760 651 2078 839"> <tbody> <tr><td><math>40 + 7</math></td></tr> <tr><td><math>30 + 5</math></td></tr> <tr><td><math>70 + 12 = 82</math></td></tr> </tbody> </table> <table border="1" data-bbox="1375 954 2085 1230"> <thead> <tr> <th>Tens</th> <th>Ones</th> </tr> </thead> <tbody> <tr> <td>10 10 10 10</td> <td>1 1</td> </tr> <tr> <td>10 10 10</td> <td>10 1 1</td> </tr> </tbody> </table> <p>Encourage children to recognise this can be completed mentally:  <math>42 - 15 = 27</math>  <math>40 + 2</math>  <math>30 + 12</math>  <math>10 + 5</math>  <math>20 + 7</math></p>	Tens	Ones	10	1	10	1	10	1	10	1	10	1	$40 + 7$	$30 + 5$	$70 + 12 = 82$	Tens	Ones	10 10 10 10	1 1	10 10 10	10 1 1
Tens	Ones																						
10	1																						
10	1																						
10	1																						
10	1																						
10	1																						
$40 + 7$																							
$30 + 5$																							
$70 + 12 = 82$																							
Tens	Ones																						
10 10 10 10	1 1																						
10 10 10	10 1 1																						

**Year 3**

**Objectives:**

Add and subtract numbers mentally  
 A 3 digit number and 1s  
 A 3 digit number and 10s  
 A 3 digit number and 100s

Add and subtract numbers with up to 3 digits using formal written methods of columnar addition and subtraction.

**Estimate**

**Calculate Check**

**Mental Recall/Jottings:**

**Bridging to 10**

$$425 + 8 = 425 + 5 + 3$$

$$= 430 + 3$$

$$= 433$$

**Rounding and Adjusting**

$$425 + 90 = 425 + 100$$

$$= 525 - 10$$

$$= 515$$

$$146 - 9 = 146 - 10 + 1$$

$$= 136 + 1$$

$$= 137$$

$$146 - 50 = 146 - 40 - 10$$

$$= 106 - 10$$

$$= 96$$

**Counting forwards or backwards in 100s**

$$636 - 500 = 136$$

**Written Methods with representations**

Pupils use their understanding of place value and partitioning, and practice using columnar addition and subtraction with increasingly large numbers up to three digits to become fluent

Hundreds	Tens	Ones

187 - 64 = 123

$$100 + 80 + 7$$

$$60 + 4$$

---

$$100 + 20 + 3$$

$$376 - 168 =$$

Using my knowledge of partitioning in different ways.  $376 = 360 + 16$

H	T	O

$$376 - 168$$

$$360 + 16$$

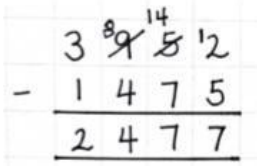

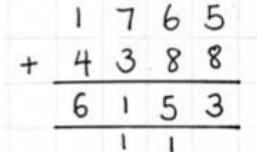

---

$$160 + 8$$

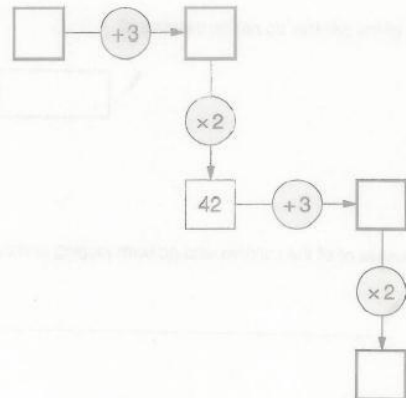

---

$$200 + 8$$

Year 4		
Objectives:	Mental Recall/Jottings:	Written Methods:
<p>Continue to secure and extend mental methods from previous year groups.</p> <p>To select whether a calculation can be done mentally, with a jotting or using a formal written method.</p> <p>Add and subtract numbers with up to 4 digits using formal written methods of column addition and subtraction where appropriate.</p>	<p>Develop confidence in calculating mentally with larger numbers using a full range of strategies:</p> <ul style="list-style-type: none"> <li>· <b>Counting in 1s/10s</b></li> <li>· <b>Bridging through multiples of 10</b></li> <li>· <b>Partitioning</b></li> <li>· <b>Rounding and Adjusting</b></li> <li>· <b>Reordering</b></li> <li>· <b>Near Doubles</b></li> <li>· <b>Bridging through 60 when calculating with time.</b></li> </ul> <p><b>Can I do it mentally?</b>  <b>Should I use a jotting?</b>  <b>Should I use a written method?</b></p>	<p>Add and subtract numbers up to four digits.</p>   <p>Revert to expanded methods if the children experience any difficulty.</p> <p>Use the written method with decimals in the context of money</p> $\begin{array}{r} \pounds 32.50 \\ + \pounds 21.75 \\ \hline \pounds 54.25 \end{array}$ $\begin{array}{r} \pounds 42.50 \\ - \pounds 13.35 \\ \hline \pounds 29.15 \end{array}$ <p>Using number to ensure children understand the process before quickly moving into numbers that do require a written method.</p>

Year 5																
Objectives:	Mental Recall/Jottings:	Written Methods:														
<p>Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)</p> <p>Add and subtract numbers mentally with increasingly large numbers</p> <p>Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy</p> <p>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.</p>	<p>12 462 – 2300</p> <p>Use knowledge of place value to calculate mentally with increasingly larger numbers.</p> <p>Employ a range of special strategies to develop confidence in calculating mentally. E.g.</p> <p><b>2364 + 1999 =</b>  2364 + 2000 = 4364  4364 – 1 = 4363</p> <p><b>13484 + 2400 =</b>  13000 + 2000 = 15000  484 + 400 = 884  15000 + 884 = 15884</p> <p>4 = 2001 – 1997</p>  <p>1997                      2000                      2001</p> <p>13486 – 5000  13486 – 3000 = 10486  10486 – 2000 = 8486</p>	<p><b>Estimate:</b></p> <p>800 + 640 = 1440      900 – 500 = 400      900 – 500 = 400</p> <p>789 + 642 becomes      874 – 523 becomes      932 – 457 becomes      932 – 457 becomes</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="text-align: center; border-right: 1px solid black;"> <math display="block">\begin{array}{r} 789 \\ + 642 \\ \hline 1431 \\ \hline \end{array}</math> </td> <td style="text-align: center; border-right: 1px solid black;"> <math display="block">\begin{array}{r} 874 \\ - 523 \\ \hline 351 \\ \hline \end{array}</math> </td> <td style="text-align: center; border-right: 1px solid black;"> <math display="block">\begin{array}{r} 8 \quad 12 \quad 1 \\ 932 \\ - 457 \\ \hline 475 \\ \hline \end{array}</math> </td> <td style="text-align: center;"> <math display="block">\begin{array}{r} 1 \quad 1 \\ 932 \\ - 457 \\ \hline 475 \\ \hline \end{array}</math> </td> </tr> <tr> <td></td> <td></td> <td style="text-align: center;"> <p>Answer: 1431      Answer: 351      Answer: 475      Answer: 475</p> </td> </tr> <tr> <td></td> <td></td> <td> <p><b>Check:</b>  <b>Is your estimate close to the answer you have calculated?</b></p> <table style="width: 100%;"> <tr> <td style="width: 50%;"> 25.356 + 346.28 becomes:  Estimate:  25 + 350 = 375 </td> <td style="width: 50%;"> 9.076 – 3.142 becomes:  Estimate:  9 – 3 = 6 </td> </tr> <tr> <td style="text-align: center;"> <math display="block">\begin{array}{r} 25.356 \\ +346.28 \\ \hline 371.636 \\ \hline \end{array}</math> </td> <td style="text-align: center;"> <math display="block">\begin{array}{r} 9.076 \\ - 3.142 \\ \hline 5.934 \\ \hline \end{array}</math> </td> </tr> </table> </td> </tr> </table>	$\begin{array}{r} 789 \\ + 642 \\ \hline 1431 \\ \hline \end{array}$	$\begin{array}{r} 874 \\ - 523 \\ \hline 351 \\ \hline \end{array}$	$\begin{array}{r} 8 \quad 12 \quad 1 \\ 932 \\ - 457 \\ \hline 475 \\ \hline \end{array}$	$\begin{array}{r} 1 \quad 1 \\ 932 \\ - 457 \\ \hline 475 \\ \hline \end{array}$			<p>Answer: 1431      Answer: 351      Answer: 475      Answer: 475</p>			<p><b>Check:</b>  <b>Is your estimate close to the answer you have calculated?</b></p> <table style="width: 100%;"> <tr> <td style="width: 50%;"> 25.356 + 346.28 becomes:  Estimate:  25 + 350 = 375 </td> <td style="width: 50%;"> 9.076 – 3.142 becomes:  Estimate:  9 – 3 = 6 </td> </tr> <tr> <td style="text-align: center;"> <math display="block">\begin{array}{r} 25.356 \\ +346.28 \\ \hline 371.636 \\ \hline \end{array}</math> </td> <td style="text-align: center;"> <math display="block">\begin{array}{r} 9.076 \\ - 3.142 \\ \hline 5.934 \\ \hline \end{array}</math> </td> </tr> </table>	25.356 + 346.28 becomes: Estimate: 25 + 350 = 375	9.076 – 3.142 becomes: Estimate: 9 – 3 = 6	$\begin{array}{r} 25.356 \\ +346.28 \\ \hline 371.636 \\ \hline \end{array}$	$\begin{array}{r} 9.076 \\ - 3.142 \\ \hline 5.934 \\ \hline \end{array}$

# Key representations to support conceptual understanding of multiplication and division

$2 + 2 + 2 + 2 + 2 = 10$   
 $2 \times 5 = 10$   
 2 multiplied by 5  
 5 pairs  
 5 hops of 2

$5 + 5 + 5 + 5 + 5 + 5 = 30$   
 $5 \times 6 = 30$   
 5 multiplied by 6  
 6 groups of 5  
 6 hops of 5

$10p + 10p + 10p + 10p + 10p = 50p$   
 $10p \times 5 = 50p$   
 5 hops of 10

$4 \times 2 = 8$

$2 \times 4 = 8$

$2 \times 4 = 8$

$4 \times 2 = 8$

$5 \times 2 = 10$

$2 \times 5 = 10$

$2 \times 5 = 10$

$5 \times 2 = 10$

half of 8 is 4  
 $8 \div 2 = 4$

double 4 is 8  
 $4 \times 2 = 8$

I'm 3 times as tall as you.  
I'm 3 metres tall.

I'm only 1 metre tall.

How many 3s in 15?

$15 \div 3 = 5$

5 hops in 15. How big is each hop?

$15 \div 5 = 3$

15 shared between 5

Three times as many

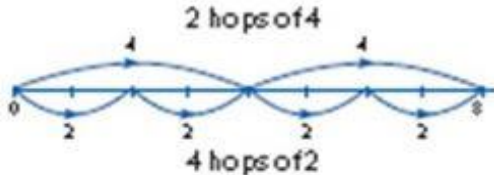

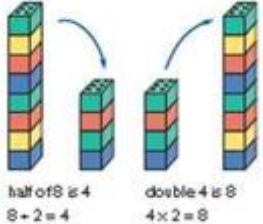

$4 \times 3 = 12$

Twice as many

$12 \times 2 = 24$

Year 1		
Objective	Examples	Representations
<p>count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens</p> <p>Double numbers to 20</p>	<p>Use of visual models to support counting in 2, 5, 10</p> <p>Ensure children begin to see the patterns of counting in 2, 5, 10.</p> <p>Double/halve numbers up to:</p> <p><math>10 + 10 = 10 \times 2</math></p> <p><math>20 - 10 = 20 \div 2</math></p> <p>Children do not need to record number sentences using the symbols. Develop the vocabulary by encouraging children to explain what they are doing.</p>	<p>Grouping and sharing</p>   <p>How many legs will 3 teddies have?</p>   <p>Arrays</p>     

Year 2		
Objective	Examples	Models and Images
<p>count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward</p> <p>(copied from Number and Place Value)</p> <p>recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers</p> <p>show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot</p> <p>Written calculate mathematically statements for multiplication and division within the multiplication tables and write them using the multiplication (<math>\times</math>), division (<math>\div</math>) and equals (<math>=</math>) signs</p>	<p><math>2 \times 5 = 10</math> <math>5 \times 2 = 10</math></p> <p><math>10 \div 2 = 5</math> <math>10 \div 5 = 2</math></p> <p>Use knowledge of doubling: <math>2 \times 10 = 20</math> <math>10 \times 2 = 20</math></p> <p><math>20 \div 2 = 10</math> <math>20 \div 10 = 2</math></p>	<p><math>4 \times 2 = 8</math> <math>2 \times 4 = 8</math> <math>2 \times 4 = 8</math> <math>4 \times 2 = 8</math></p> <p>How many 3s in 15? <math>15 \div 3 = 5</math></p> <p>5 hops in 15. How big is each hop? <math>15 \div 5 = 3</math> 15 shared between 5</p> <p><math>3 \times 5 = 15</math> <math>15 \div 5 = 3</math></p> <p>10 5 2</p>

Year 3																																						
Objective	Mental Recall Examples	Progressing from Mental to Written Methods with representations																																				
<p>count from 0 in multiples of 4, 8, 50 and 100 (copied from Number and Place Value)</p> <p>recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables</p> <p>write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (appears also in Written Methods)</p>	<p>If the children know 2/5/10 facts they now need to learn:</p> <p>3 x 3   4 x 4   6 x 8</p> <p>4 x 3   6 x 4   7 x 8</p> <p>6 x 3   7 x 4   8 x 8</p> <p>7 x 3   8 x 4   9 x 8</p> <p>8 x 3   9 x 4   11 x 8</p> <p>9 x 3   11 x 4   12 x 8</p> <p>11 x 3   12 x 4</p> <p>12 x 3</p> <p>With corresponding division facts. Recall facts along with counting in steps sizes.</p> <p></p> <p><math>4 \times 3 = 3 \times 4</math></p> <p><math>12 \div 3 = 4</math></p> <p><math>12 \div 4 = 3</math></p> <p>To make 6 fairy cakes, you need...</p> <p>How much will you need for 12?</p>	<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> <math display="block">\begin{array}{r l} \times &amp; 10 &amp; 5 \\ \hline 5 &amp; 50 &amp; 25 \end{array}</math> </div> <div style="font-size: 2em;">➔</div> <div style="border: 1px solid black; padding: 5px;"> <table style="width: 100%; text-align: center;"> <tr><td style="background-color: yellow;">10</td><td>1</td><td>1</td><td>1</td><td>1</td><td>1</td></tr> <tr><td style="background-color: yellow;">10</td><td>1</td><td>1</td><td>1</td><td>1</td><td>1</td></tr> <tr><td style="background-color: yellow;">10</td><td>1</td><td>1</td><td>1</td><td>1</td><td>1</td></tr> <tr><td style="background-color: yellow;">10</td><td>1</td><td>1</td><td>1</td><td>1</td><td>1</td></tr> <tr><td style="background-color: yellow;">10</td><td>1</td><td>1</td><td>1</td><td>1</td><td>1</td></tr> </table> </div> </div> <div style="display: flex; justify-content: center; align-items: center; margin-top: 20px;"> <div style="text-align: center;"> <math display="block">\begin{array}{r} 15 \\ \times 5 \\ \hline 25 \\ + 50 \\ \hline 75 \end{array}</math> </div> <div style="font-size: 2em;">➔</div> </div> <div style="margin-top: 20px;"> <p><math>36 \div 3 =</math></p>  </div> <div style="margin-top: 20px;"> <p><math>45 \div 3 = 15</math></p> <table style="border-collapse: collapse; margin-left: 20px;"> <tr> <td style="border-right: 1px solid black; padding: 5px;"><math>3 \overline{) 45}</math></td> <td style="padding: 5px;">40</td> <td style="padding: 5px;">5</td> </tr> <tr> <td style="border-right: 1px solid black; padding: 5px;"></td> <td style="padding: 5px;"></td> <td></td> </tr> </table> </div> <p style="text-align: center; margin-top: 20px;"><b>Short multiplication and division rely on mental methods – children should be given short multiplication and division involving 2/3/4/5/6/10 times tables</b></p>	10	1	1	1	1	1	10	1	1	1	1	1	10	1	1	1	1	1	10	1	1	1	1	1	10	1	1	1	1	1	$3 \overline{) 45}$	40	5

$3 \overline{) 45}$	40	5																																				
																																						

**Year 4**

**Objective**

count in multiples of 6, 7, 9, 25 and 1 000 (copied from Number and Place Value)

recall multiplication and division facts for multiplication tables up to  $12 \times 12$

Use place value, known and derived facts to multiply and divide mentally, including multiplying by 0 and 1; dividing by 1; multiplying together three numbers.

recognise and use factor pairs and commutativity in mental calculations (also appears in Properties of Numbers)

multiply two-digit and three-digit numbers by a one-digit number using formal written layout

**Mental Methods**

If the children know multiplication and division facts for 2/5/10/3/4/8/ they now need to learn.

$6 \times 6$   $7 \times 7$   $9 \times 9$   $11 \times 11$

$7 \times 6$   $9 \times 7$   $11 \times 9$   $12 \times 11$

$9 \times 6$   $11 \times 7$   $12 \times 9$   $12 \times 12$

$11 \times 6$   $12 \times 7$

$12 \times 6$

Explore what happens when we divide by 1 and 0.

To solve  $24 \times 3$

Use knowledge of factor pairs.

$8 \times 3 \times 3$

$6 \times 4 \times 3$

In measuring and scaling contexts, (for example, four times as high, eight times as long etc.) and correspondence problems in which m objects are connected to n objects (for example, 3 hats and 4 coats, how many different outfits?; 12 sweets shared equally between 4 children; 4 cakes shared equally between 8 children).

**Written Methods with representations**

**These are the methods from the appendix of the National Curriculum. Schools should agree on the methods that they are going to use.**

Short multiplication

$24 \times 6$  becomes

$$\begin{array}{r} 24 \\ \times 6 \\ \hline 144 \end{array}$$

Answer: 144

Long multiplication

$24 \times 18$  becomes

$$\begin{array}{r} 24 \\ \times 18 \\ \hline 192 \\ 240 \\ \hline 432 \end{array}$$

Answer: 384

$24 \times 12$  becomes

$$\begin{array}{r} 24 \\ \times 12 \\ \hline 48 \\ 240 \\ \hline 288 \end{array}$$

Answer: 288

$124 \times 12$  becomes

$$\begin{array}{r} 124 \\ \times 12 \\ \hline 248 \\ 1240 \\ \hline 1488 \end{array}$$

Answer: 1488

$24 \times 32$  becomes

$$\begin{array}{r} 24 \\ \times 32 \\ \hline 48 \\ 720 \\ \hline 768 \end{array}$$

Answer: 768

$124 \times 28$  becomes

$$\begin{array}{r} 124 \\ \times 28 \\ \hline 992 \\ 2480 \\ \hline 3472 \end{array}$$

Answer: 3472

Short division

$432 \div 5$  becomes

$$86 \text{ r } 2$$

Answer: 86 remainder 2

$574 \div 15$  becomes

$$38 \frac{2}{3}$$

Answer:  $38 \frac{2}{3}$

$511 \div 35$  becomes

$$14 \frac{6}{35}$$

Answer:  $14 \frac{6}{35}$

Long division

$432 \div 15$  becomes

$$28 \text{ r } 12$$

Answer: 28 remainder 12

$432 \div 15$  becomes

$$28 \frac{4}{5}$$

Answer:  $28 \frac{4}{5}$

$432 \div 15$  becomes

$$28.8$$

Answer: 28.8

**Year 5**

**Objective**

count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000

multiply and divide numbers mentally drawing upon known facts

multiply and divide whole numbers and those involving decimals by 10, 100 and 1000

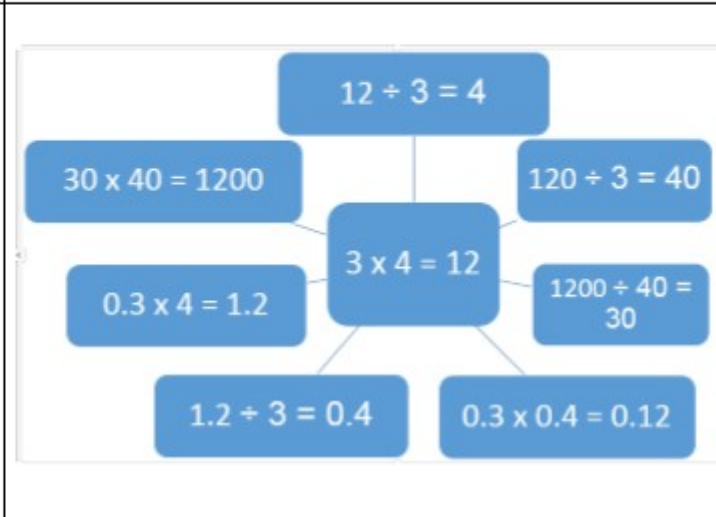

Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers.

know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers

establish whether a number up to 100 is prime and recall prime numbers up to 19

recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3)

**Mental Methods**

$1 \times 1 = 1^2$  
  
 $2 \times 2 = 2^2$  
  
 $3 \times 3 = 3^2$

$1 \times 1 \times 1 = 1^3$  
  
 $2 \times 2 \times 2 = 2^3$  
  
 $3 \times 3 \times 3$

**Multiplying and dividing whole numbers and decimals by 10, 100 and 1000.**

Thousands	Hundreds	Tens	Ones	/10 (tenths)	/100 (Hundredths)

Year 6	
Objective	Mental Methods
<p>perform mental calculations, including with mixed operations and large numbers</p> <p>identify common factors, common multiples and prime numbers</p> <p>Use their knowledge of the order of operations to carry out calculations involving the four operations</p>	<p>They undertake mental calculations with increasingly large numbers and more complex calculations. Pupils continue to use all the multiplication tables to calculate mathematical statements to maintain their fluency. Pupils round answers to a specified degree of accuracy, for example, to the nearest 10, 20, 50 etc., but not to a specified number of significant figures.</p> <p>Pupils explore the order of operations using brackets; for example, <math>2 + 1 \times 3 = 5</math> and <math>(2 + 1) \times 3 = 9</math>.</p> <p>Common factors can be related to finding equivalent fractions.</p> <p>Calculate <math>900 \div (45 \times 4)</math>.</p> <p>A bag of four oranges costs thirty seven pence. How much do twelve oranges cost?</p>

**Year 6 Continued**

**Objective**

**Written Methods**

multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication

divide numbers up to 4-digits by a two-digit whole number using the formal written method of short division where appropriate for the context divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context

**Short division**

98 ÷ 7 becomes

$$\begin{array}{r} 14 \\ 7 \overline{) 98} \\ \underline{7} \phantom{0} \\ 28 \\ \underline{28} \\ 0 \end{array}$$

Answer: 14

432 ÷ 5 becomes

$$\begin{array}{r} 86 \text{ r}2 \\ 5 \overline{) 432} \\ \underline{40} \phantom{0} \\ 32 \\ \underline{30} \\ 2 \end{array}$$

Answer: 86 remainder 2

496 ÷ 11 becomes

$$\begin{array}{r} 45 \text{ r}1 \\ 11 \overline{) 496} \\ \underline{44} \phantom{0} \\ 56 \\ \underline{55} \\ 1 \end{array}$$

Answer:  $45 \frac{1}{11}$

**Long division**

432 ÷ 15 becomes

$$\begin{array}{r} 28 \text{ r}12 \\ 15 \overline{) 432} \\ \underline{30} \phantom{0} \\ 132 \\ \underline{150} \\ 12 \end{array}$$

432 ÷ 15 becomes

$$\begin{array}{r} 28 \\ 15 \overline{) 432} \\ \underline{30} \phantom{0} \\ 132 \\ \underline{150} \\ 12 \end{array}$$

$15 \times 20$

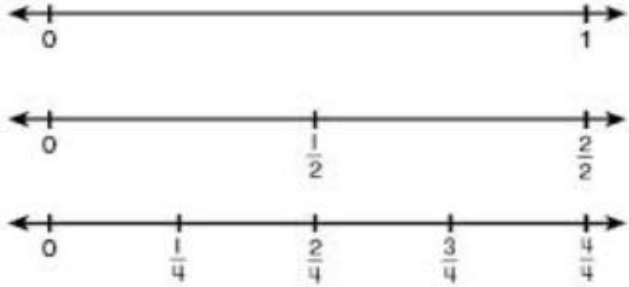

$15 \times 8$

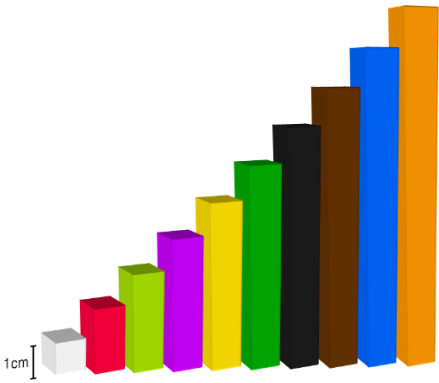

$$\frac{12}{15} = \frac{4}{5}$$

432 ÷ 15 becomes

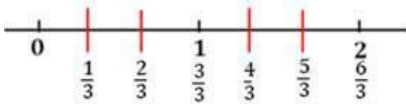

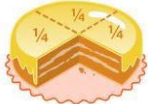

$$\begin{array}{r} 28.8 \\ 15 \overline{) 432.0} \\ \underline{30} \phantom{0} \\ 132 \\ \underline{150} \\ 120 \\ \underline{150} \\ 0 \end{array}$$

**DEVELOPING UNDERSTANDING OF FRACTIONS/DECIMALS AND PERCENTAGES**

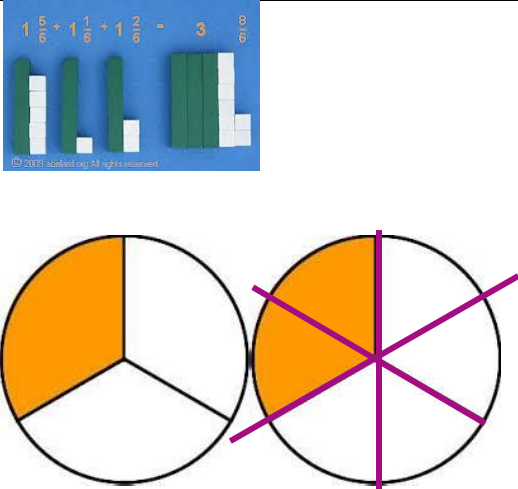

Year	Objectives	Examples	Models and Images
Year 1	<ul style="list-style-type: none"> <li>Recognise, find and name a half as one of two equal parts of an object, shape or quantity</li> <li>Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity</li> </ul>	<p>Children use their knowledge of fractions of shape to find fractions of quantities.</p> <p>Children should be given practical apparatus to find halves and quarters of quantities within 20.</p> <p>Record work pictorially.</p>	
Year 2	<ul style="list-style-type: none"> <li>Recognise, find, name and write fractions, and of a length, shape, set of objects or quantity</li> <li>Write simple fractions for example, <math>\frac{1}{2}</math> of 6 = 3 and recognise the equivalence of and. <math>\frac{1}{2}</math> = <math>\frac{2}{4}</math></li> </ul>	<p>Children use their knowledge of unit and non-unit fractions of shapes to find fractions of quantities. They relate this to find fractions of a length, e.g. <math>\frac{2}{4}</math> of 1m =</p> <p>Children need to relate finding a quarter to halving and halving again.</p> <p><i>Pupils should count in fractions up to 10, starting from any number and using the <math>\frac{1}{2}</math> and <math>\frac{2}{4}</math> equivalence on the number line (Non-Statutory Guidance)</i></p>	<p>If I can see <math>\frac{1}{4}</math> how many quarters can you see?</p>  <p>If I can see <math>\frac{2}{3}</math> how many thirds can you see?</p>   

Year	Objectives	Examples	Models and Images																																																											
Year 3	<ul style="list-style-type: none"> <li>count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10</li> <li>recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators</li> <li>recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators</li> <li>recognise and show, using diagrams, equivalent fractions with small denominators</li> </ul>	<p>Encourage children to count up and down in tenths.</p> <p><math>1 \div 10 = 1/10</math>  <math>2 \div 10 = 2/10</math>  <math>3 \div 10 = 3/10</math></p> <p>Continue the pattern.  What do you notice? What's the same? What's different?</p> <p>Children can use fractions as an operator  E.g.  <math>1/4</math> of 12 = <math>12 \div 4 = 3</math></p> <p>Children can relate fractions to the division of integers  <math>1 \div 4 = 1/4</math>  <math>4 \times 1/4 = 1</math>  <math>3 \div 4 = 3/4</math>  <math>3/4 \times 4 = 3</math> (<math>12/4</math> or <math>3/4 + 3/4 + 3/4 + 3/4</math>)</p> <p>Children need to relate and reason about why their diagrams are equivalent to a half – make connections between the numerator and the denominator  E.g. <math>1/2 = 4/8</math>  The numerator will be half of the denominator.  Children should be encouraged to make the connection between their multiplication tables and</p>	<p style="text-align: center;"><math>1 \div 10 = 1/10</math></p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td>1/10</td><td>1/10</td><td>1/10</td><td>1/10</td><td>1/10</td><td>1/10</td><td>1/10</td><td>1/10</td><td>1/10</td><td>1/10</td><td>1/10</td> </tr> <tr> <td>0</td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td>1</td> </tr> </table> <p style="text-align: center;"><math>2 \div 10 = 2/10</math></p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td>2/10</td><td>2/10</td><td>2/10</td><td>2/10</td><td>2/10</td><td>2/10</td><td>2/10</td><td>2/10</td><td>2/10</td><td>2/10</td><td>2/10</td> </tr> <tr> <td>0</td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td>2</td> </tr> </table> <table style="margin-left: auto; margin-right: auto;"> <tr> <td>0</td><td style="text-align: center;">3</td><td style="text-align: center;">6</td><td style="text-align: center;">9</td><td style="text-align: center;">12</td> </tr> <tr> <td></td><td style="border: 1px solid black; width: 100px; height: 20px;"></td><td style="border: 1px solid black; width: 100px; height: 20px;"></td><td style="border: 1px solid black; width: 100px; height: 20px;"></td><td style="border: 1px solid black; width: 100px; height: 20px;"></td> </tr> <tr> <td>0</td><td style="text-align: center;"><math>1/4</math></td><td style="text-align: center;"><math>1/2</math></td><td style="text-align: center;"><math>3/4</math></td><td style="text-align: center;"><math>4/4</math></td> </tr> </table> <p>Use Cuisenaire rods to develop vocabulary of equivalence.</p> 	1/10	1/10	1/10	1/10	1/10	1/10	1/10	1/10	1/10	1/10	1/10	0										1	2/10	2/10	2/10	2/10	2/10	2/10	2/10	2/10	2/10	2/10	2/10	0										2	0	3	6	9	12						0	$1/4$	$1/2$	$3/4$	$4/4$
